

WESTSHIELD SURFACING

Surfacing is a specialist division of Westshield Ltd, a multi-disciplined civil engineering specialist with over 30 years of valued experience.

Westshield Surfacing has established an unparalleled reputation for delivering the highest standards of quality workmanship on a wide range of projects for utility, local authority, private and public sector clients.

Its commitment to delivering customer satisfaction has resulted in 100% client retention since inception.

All staff are directly employed and, in addition to CITB standards of training, are accredited to lay HAPAS BBA materials (new SMA type materials i.e. Clause 942).

A full range of bituminous products can be administered, from thin pave surfacing to traditional HRA and Asphalt surfacing.

The expertise of Westshield's Surfacing Teams, encompassing both patching and machine lay crews, has been utilised to complete a significant number of Local Authority roads throughout the region.

SERVICES OFFERED

ASPHALT SURFACING

Each year, Westshield lays over 38,000 tonnes of bituminous Macadam and Asphalt materials. Machine teams are available for such works as:

- Highway Maintenance Projects (including section 38 and 278)
- Full Road Construction
- Access Roads
- Car Parks
- Industrial Estates
- Housing Estates
- Traffic Calming
- Sports Grounds

HAND LAYING

A number of experienced hand lay teams are available to carry out such works as:

- Residential Driveways
- Footpaths to public highways
- Minor Patch Work
- Utilities Works
- Kerb Stone Laying
- Flagging
- Block Paving
- Coloured Macadams

PREPARATION WORK

Westshield Surfacing offers a full preparation service prior to final surfacing or block paving. Skills include road planing and a full level and drainage level check in addition to kerb remedials, reinstatements to existing defective surfacing and raising and replacing ironworks.

ADOPTIONS

Site adoptions can be mastered in an efficient manner helping retrieve the company of any bond amounts it is still accountable for. In co-operation with the Local Authority, Westshield will determine the extent of remedial work and will plan a construction schedule leading the project to completion.

RESOURCES

An extensive in house plant fleet consisting of modern paving machines, tractairs and rollers allows the team to undertake Client projects in a prompt and efficient manner.

KEY FACILITIES INCLUDE:

- Paving machines equipped with sensor control for accuracy when laying coated materials
- Laser control options for more challenging projects such as tennis courts where the laying intolerance can be reduced to +/- 3mm

RECENT PROJECTS

A634 Westgate, Cleckheaton - Kirklees MBC (£240k value)

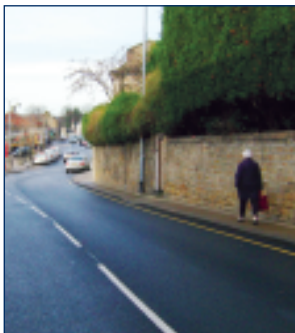

The reconstruction and resurfacing of approx 1175m of busy trunk road and footways with 100mm deep new material, junction improvements, bus stops, controlled/uncontrolled crossing with all associated ducting, chambers, drop crossing, tactile paving and road markings.

Bootle Canal Towpath – Sefton BC (£55k value)

The refurbishment of footpaths along the canal including groundworks to the existing tow path, excavation of the existing surface and the supply and lay of a new binder course and a buff coloured mastertint surface course.

Birstall Town Centre Regeneration Kirklees MBC (£80k value)

A highways/streetscape regeneration improvements scheme in a busy town centre, involving improvements to footpaths and carriageways and extensive streetscape works to a historic marketplace.

Bolton Road & Golbourne Road, Ashton-in-Makerfield - Wigan BC (£24k Value)

The resurfacing and anti-skid works of the main carriageway, including planing operations and ironwork adjustments, all undertaken under temporary traffic control.

Over the last six years, Westshield Surfacing has laid in excess of 250,000 tonnes of surfacing materials across a wide range of complex projects. In addition to surfacing expertise, all of Westshield's key resources have been at the disposal of Clients, including haulage, civil engineering, waste disposal and traffic management – working together to complete contracts to client specification and within their timescale and budget.
